Why use kits?

- Reduce internal labor costs of purchasing and installation of material.
- Reduce inventory of components.
- Reduce returns.
- Reduce cost of labor on activities that hinder installation.
- Decrease installation time.
- Increase installation success.

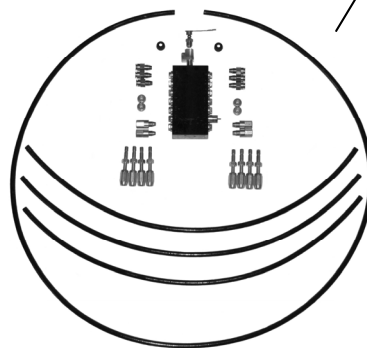

Series Progressive Lubrication System

Intraflo Products provides cost effective, need-specific kits. Our kitting ranges from a completely assembled and tested bolt-on solution to individual components specific to your application. You may also request NLGI #2 grease or non-grease filled, labeled or non-labeled hose/tubing.

To learn more about what Intraflo Products can do for your company, contact us at 816-781-9313.
